Education

Georgia Institute of Technology Atlanta, GA
College of Computing Class of 2016
Bachelor of Science in Computer Science
GPA: 3.95

Work Experience

July 2016 — Present

Full-Stack Developer at Redfin

- Developed Redfin's desktop and mobile web search page. Work includes search using Solr, performance optimization using Postgres and Redis, Search Engine Optimization using React and Google Search Console, and API and automated testing with Enzyme, Selenium, and RestAssured.

May 2015 — August 2015

Software Engineering Intern at Yahoo!

- Built applets for Yahoo Search that provide the users with the information they need right on the search results page.

January 2014 – October 2014

Software Developer Intern at BrainJocks

- Improved the security of ASP.Net web applications (XSS, CSRF, Injections, Unvalidated Redirects) and built a video streaming platform using Azure Media Services.

Teaching

RESTful Web API Design with Node.js

Published with Packt Publishing

- A video course about using and creating RESTful Web APIs with Node.js. The course was an O'Reilly bestseller in March 2017.

Introduction to Web Development

Taught at gt-webdev

- Helped students learn basic web development skills and published videos to the organization's Youtube channel.

Skills

- Frontend: JavaScript, HTML, CSS, React, Backbone.js, Responsive Design, WordPress
- Backend: Node.js, Java, Spring, Hibernate, Postgres, MySQL, SQL, Redis, Solr, Grafana, Kibana, New Relic, ASP.NET MVC, Entity Framework, Microsoft SQL Server, PHP

Awards

- My team won 3rd place in the ACM Intercollegiate Programming Competition 2012 Southeast Regionals in Georgia Institute of Technology
- Won 1st place in Kennesaw State University's Emerging Writers' Contest.
