Work Experience

- November 2018 — Present Software Engineer at Google
 - Worked on Reserve with Google, which is used for restaurant reservations, hair salon bookings, and event ticketing on Search and Maps. Built Google Duplex reservations and the Payments UI. Worked with DB schemas, C++ / Java API servers, messaging queue, JavaScript frontend, and internationalization. Also served as a Java Readability Reviewer
- July 2016 — October 2018 Full-Stack Developer at Redfin
 - Worked on Redfin's desktop and mobile web search page. Work includes search using Solr, performance optimization using YourKit Java Profiler, Redis, and Chrome Dev Tools, Search Engine Optimization using React and Google Search Console, and API and automated testing with Enzyme, Selenium, and RestAssured. Aside from coding, I mentored 2 interns and served on Redfin's Security Working Group.
- May 2015 — August 2015 Software Engineering Intern at Yahoo!
 - Built applets for Yahoo Search that provide the users with the information they need right on the search results page.
- January 2014 – October 2014 Software Developer Intern at BrainJocks
 - Improved the security of ASP.Net web applications (XSS, CSRF, Injections, Unvalidated Redirects) and built a video streaming platform using Azure Media Services.
